

Insight Client Owned Inventory Program

Get the IT assets you need, when you need them.

Overview & Storage Timeline

Insight offers IT supply chain and lifecycle services to help clients overcome challenges with procurement, configuration, storage and deployment. The Client Owned Inventory (COI) Program is a warehousing service where clients may purchase a product and store it with Insight for up to 60 days.

A few examples for use of the program include:

- A product is at the end of its life.
- Products are to be rolled out over a period of time.
- Storing custom-built systems will ensure product availability for rush deployment.
- Some products require extended storage beyond a 30-day period. This is for clients that use the Client Reserved Inventory (CRI) Program.

Qualifications

To qualify for this offering, clients must:

- A valid COI agreement must be signed and on file with Insight.
- The client must issue Insight a noncancelable purchase order for the stock requested.

Benefits

- Streamlined IT procurement
- Secure hardware storage
- Faster asset deployment
