Microsoft Azure Sentinel Workshop

Gain a bird's eye view across your enterprise with SIEM for a modern world

"With everything running through Azure Sentinel, we've reduced the time spent on case management and resolution of alerts by approximately 50 percent" - Stuart Gregg, Cyber Security Operations Lead, ASOS

As IT becomes more strategic, the importance of security grows daily. Security information and event management (SIEM) solutions built for yesterday's environments struggle to keep pace with today's challenges—let alone tomorrow's unimagined risks.

That's why Microsoft developed Azure Sentinel, a fully cloud-native SIEM.

See and stop threats before they cause harm with an Azure Sentinel Workshop

Azure Sentinel delivers intelligent security analytics and threat intelligence across the enterprise, providing a single solution for alert detection, threat visibility, proactive hunting, and threat response.

Get an overview of Azure Sentinel along with insights on active threats to your Microsoft 365 cloud and on-premises environments with an Azure Sentinel Workshop.

Choose the approach that's best for you

Every organisation is different, so this workshop can be customised to fit your environment and goals. We can provide either of two scenarios:

1. **Remote monitoring**
   If your organisation doesn't have its own security operations center (SOC) or if you want to offload some monitoring tasks, we will demonstrate how Insight can perform remote monitoring and threat hunting for you.

2. **Joint threat exploration**
   If your organisation is interested in learning how to integrate Azure Sentinel in your existing SOC by replacing or augmenting an existing SIEM, we will work with your SecOps team and provide additional readiness to bring them up to speed.

Workshop highlights

- Understand the features and benefits of Azure Sentinel

- Gain visibility into threats across email, identity, and data

- Better understand, prioritise, and mitigate potential threat vectors

- Create a defined deployment roadmap based on your environment and goals

- Develop joint plans and next steps

GET STARTED

Workshop objectives

Through this workshop, we will work with you to:

- **Discover threats** to your Microsoft 365 cloud and on-premises environments across email, identity and data.
- **Understand how to mitigate threats** by showing how Microsoft 365 and Azure security products can help mitigate and protect against threats that are found.
- **Plan next steps** and provide information to build a business case for a production deployment of Azure Sentinel including a technical deployment roadmap.

In addition, depending on the selected scenario, you will also:

Remote Monitoring scenario -
Experience the benefits of a managed monitoring with a true cloud native SIEM, managed and monitored by your cybersecurity experts.

Joint Threat Exploration scenario -
Receive hands-on experience, learn how to discover and analyse threats using Azure Sentinel and how to automate your Security Operations to make it more effective.
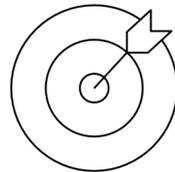

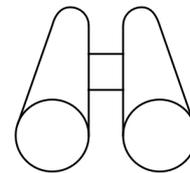

What we will do:

Analyse your requirements and priorities for a SIEM deployment
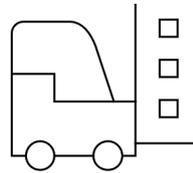

Define scope & deploy Azure Sentinel in your production environment

Remote monitoring* and proactive threat hunting to discover attack indicators *optional component

Discover threats and demonstrate how to automate responses

Recommend next steps on how to proceed with a production implementation of Azure Sentinel

Why Insight for Microsoft?

Few can compare with our relationship with Microsoft. Partners for 25 years and counting, we are the largest Microsoft global partner with more than 1,200 consultants and 150 dedicated Microsoft resources globally. We have made significant infrastructure investments and have earned numerous recognitions.

15+ **Gold & Silver competencies, including:**
- Application Development
- Application Integration
- Cloud Platform
- Cloud Productivity
- Cloud Customer Relationship Management Data Analytics
- Datacenter
- Small and Midmarket Cloud Solutions

Microsoft Partner Awards, including:
- 2020 Worldwide Customer Experience Partner of the Year
- 2020 Worldwide Solution Assessment Partner of the Year - Finalist
- Microsoft Security 20/20 Partner Award for Azure Security Deployment Partner of the Year
- 2019 Education Partner of the Year - Finalist
- 2019 Customer Experience Partner of the Year - Finalist
