

Connected Platform for Thermal Detection

A simpler way to prioritize both health and privacy on the path to a smarter, safer organization

Getting back to business

Today, organizations of every size and industry face a common challenge — enabling a faster, safer return to the workplace.

Technologies such as contactless thermal imaging cameras can help you build a proactive, noninvasive strategy that instills confidence without compromising employee or customer privacy.

Insight Connected Platform™ makes it easy to deploy, manage and scale these and other intelligent solutions through one, simple application, serving as the foundation for a comprehensive detection and prevention strategy.

Our solution

Insight's flexible, scalable Internet of Things (IoT) solution provides a framework for managing all your smart devices, sensors and systems in one place. A user-friendly app makes it easy to integrate thermal devices, receive alerts, track trends and gain new insights across your business — transforming your data into a powerful, real-time decision-making tool.

Benefits

- Build a quick, cost-effective strategy for the safe return to work.
- Detect elevated temperatures in individuals or groups.
- Initiate customizable alert and response workflows.
- Manage data to gain new insights and drive decision-making.
- Leverage historical data to improve confidence among consumers.

How it works

Best-in-class **thermal cameras** from Bolide and Tidel are easy to install at designated entry points and **integrate seamlessly with the Connected Platform app**. Depending on the model selected, these devices provide **quick, accurate scans** of individuals or groups of up to 45 people at once.

If an elevated human temperature is detected, **automated alerts are securely routed through Connected Platform** to authorized users. Role-based access, permissions and workflows can be **customized** based on your unique company policies.

Authorized users promptly receive a **notification or email** enabling them to initiate **proactive next steps** while meeting your organization's compliance requirements.

This data can then be used to provide an aggregated view of **trends over time**, providing the historical **insights to drive decision-making** and build confidence among employees and guests.

Award-winning capabilities

2020 Microsoft® U.S. Partner of the Year Award
